Performance Improvement in the Private Sector

Jacobs with The Health Facilities

Fire doors are a crucial part of the passive fire protection of every commercial, public and multiple occupancy building. They save lives and property. However, the extent of fire door failures is significant – a 2015 Fire Door Inspection Scheme review of fire door safety standards showed that over 61% of fire doors inspected had problems. Jacobs has developed a streamlined digital compliance solution that helps building owners perform fire door surveys more efficiently and effectively. The solution enables more accurate and detailed compliance management for individual fire doors, ensuring that remedial actions can be tracked and resolved.
