

## *MCA Awards 2018 Finalist*

### **Performance Improvement in the Public Sector**

#### **Atos Consulting with Genomics - Cancer fast track process**

Genomics England is a pioneering government programme to bring advanced genomic medicine into mainstream services. Its objective is to sequence 100,000 genomes for patients with rare diseases and cancer for delivery of personalised treatments.

Establishing a complex genome analysis pipeline that returns recommendations to clinicians within a clinically-relevant timescale is critical. Enabled by Atos Consulting, Genomics England has accelerated times from 9 months to 1-3 months, and established a fast-track of just 14-17 days.

Genomics England is now positioned to realise the NHS' dream of becoming the world's first health service to commission mainstream personalised care.
