### **Performance Improvement in the Public Sector Ayiming with Great Ormond Street Hospital**

Facing substantial financial, operational and clinical challenges, Great Ormond Street Hospital (GOSH) appointed Ayiming to review and transform its supply chain and inventory management practices.

Ayiming identified the need to create a single point of ownership and a standard process for all inventory management and developed a pilot programme to implement a streamlined supply chain, based on these principles. The pilot delivered immediate financial, operational and clinical benefits, prompting the roll-out to all areas of the Trust.

Clinical staff have been freed up to perform front-line duties. GOSH also now enjoys an unprecedented level of control over medical supplies use.
